Special issue

Soil and rock gas geochemistry, edited by Stephen E. Kesler

Introduction vii
Application of naturally occurring gases as geochemical pathfinders in prospecting for endogenetic deposits
A.I. Fridman (Moscow, U.S.S.R.) 1
Carbon dioxide and nitrogenous gases in the soil atmosphere
R.G. Amundson and E.A. Davidson (Berkeley, Calif., U.S.A.) 13
Production of sulfur gases and carbon dioxide by synthetic weathering of crushed drill cores from the Santa Cruz porphyry copper deposit near Casa Grande, Pinal County, Arizona
M.E. Hinkle, J.L. Ryder, S.J. Sutley and T. Botinelly (Denver, Colo., U.S.A.) 43
Stable isotopes of carbon dioxide in soil gas over massive sulfide mineralization at Crandon, Wisconsin
C.N. Alpers (Menlo Park, Calif., U.S.A.), D.L. Dettman and K.C. Lohmann (Ann Arbor, Mich., U.S.A.) and D. Brabec (Vancouver, B.C., Canada) 69
The use of soil-gas CO_2 in the exploration for sulfide-bearing breccia pipes in northern Arizona
A.R. Reid (Arvada, Colo., U.S.A.) and J.D. Rasmussen (Denver, Colo. U.S.A.) 87
Application of soil-gas geochemistry to mineral exploration in Africa
T.K. Ball and M.J. Crow (Nottingham, U.K.), N. Laffoley (Accra, Ghana), D. Piper and J. Ridgway (Nottingham, U.K.) 103
Dispersion of soil gas around micron gold deposits
S.E. Kesler and M.J. Gerdenich (Ann Arbor, Mich., U.S.A.), R.C. Steininger and C. Smith (Reno, Nev., U.S.A.) 117
Research and application of soil-gas mercury surveys for locating deep uranium bodies
Yunfei You and Xiuji Li (Beijing, P.R. China) 133
Mercury vapor surveys: technique and results
V.Z. Fursov (Moscow, U.S.S.R.) 145
JM-3 digital gold-film Hg meter
Wang Veshi (Langzhou, P.R. China) and Liu Quan-Qing (Beijing, P.R. China) 157
Sampling variability of radon in soil gases
A.W. Rose, A.R. Hutter and J.W. Washington (University Park, Penn., U.S.A.) 173
Regional soil-gas helium distribution of the Ely and Delta 1 × 2quadrangles, Basin and Range Province
G.M. Reimer and C.G. Bowles (Denver, Colo., U.S.A.) 193
Volatile hydrocarbons in Ba-Zn-Pb ore genesis: analysis and use in mineral exploration
J.R. Disnar (Orleans, France) 205
Application of artificial sorbents for testing gas seeps on the seafloor and on shore
V.K. Lukashev (Minsk, U.S.S.R.) 225
Multiple gas analyses using a mobile mass spectrometer
J.H. McCarthy Jr. (Reno, Nev., U.S.A.) and R.C. Bigelow (Denver, Colo., U.S.A.) 233

Research Papers

The Schefferville area: multivariate analysis and variography used to enhance interpretation of lake sediment geochemical data
D. Marcotte and J.S. Fox (Montreal, Queb., Canada) 247
Exploration for Mississippi-Valley type stratabound Zn ores with stream suspensates and stream sediments, Virginia, U.S.A.
F.R. Siegel (Washington, D.C., U.S.A.) 265
Evaluation of the fluid-inclusion crushing-stage as an aid in exploration for mesothermal gold-quartz deposits
L.W. Diamond and D.D. Marshall (Ottawa, Ont., Canada) 285
Quantitative analysis of anomalous sources and geochemical signatures in the Walker Lake quadrangle of Nevada and California
G.-C. Pan and D.P. Harris (Tucson, Ariz., U.S.A.) 299
Geology and geochemistry of gossans and ironstones in carbonate and alumino-silicate environments in northeastern Algeria
E. Hanssen (Heverlee, Belgium) and M. Bourezg (Constantine, Algeria) 323
Evaluation of a merucry-vapour detection system in base- and precious-metal exploration, northern Manitoba
M.A.F. Fedikow (Winnipeg, Manit., Canada) and S.D. Amor (Lynn Lake, Manit., Canada) 351
Discrimination of gossans using principal components analysis of standardized data
M. Vairinho, E.C. Fonseca and H.G. Pereira (Lisbon, Portugal) 375
